

A dynamic splash of clear blue water against a white background. The water is captured in mid-air, with a central droplet falling and creating a series of smaller droplets and bubbles below the main splash. The water surface is rippled and translucent, showing internal reflections and refractions.

Aliaxis

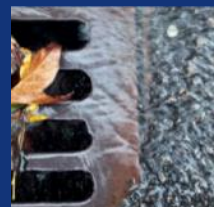

A horizontal bar composed of several colored segments: green, cyan, red, cyan, dark blue, orange, and grey.

Discovering Aliaxis

Leader in fluid handling solutions

Aliaxis is a global leader in the manufacturing and distribution of fluid handling solutions.

Aliaxis is privately-owned. Headquarters are based in **Belgium**.

Our broad offering of **plastic pipes and fittings** find their way to buildings, infrastructure and industrial applications across the globe.

The group generates **€ 2.7 billion** in annual revenue¹.

¹ Figures in this presentation relate to Financial Year 2014 unless otherwise stated

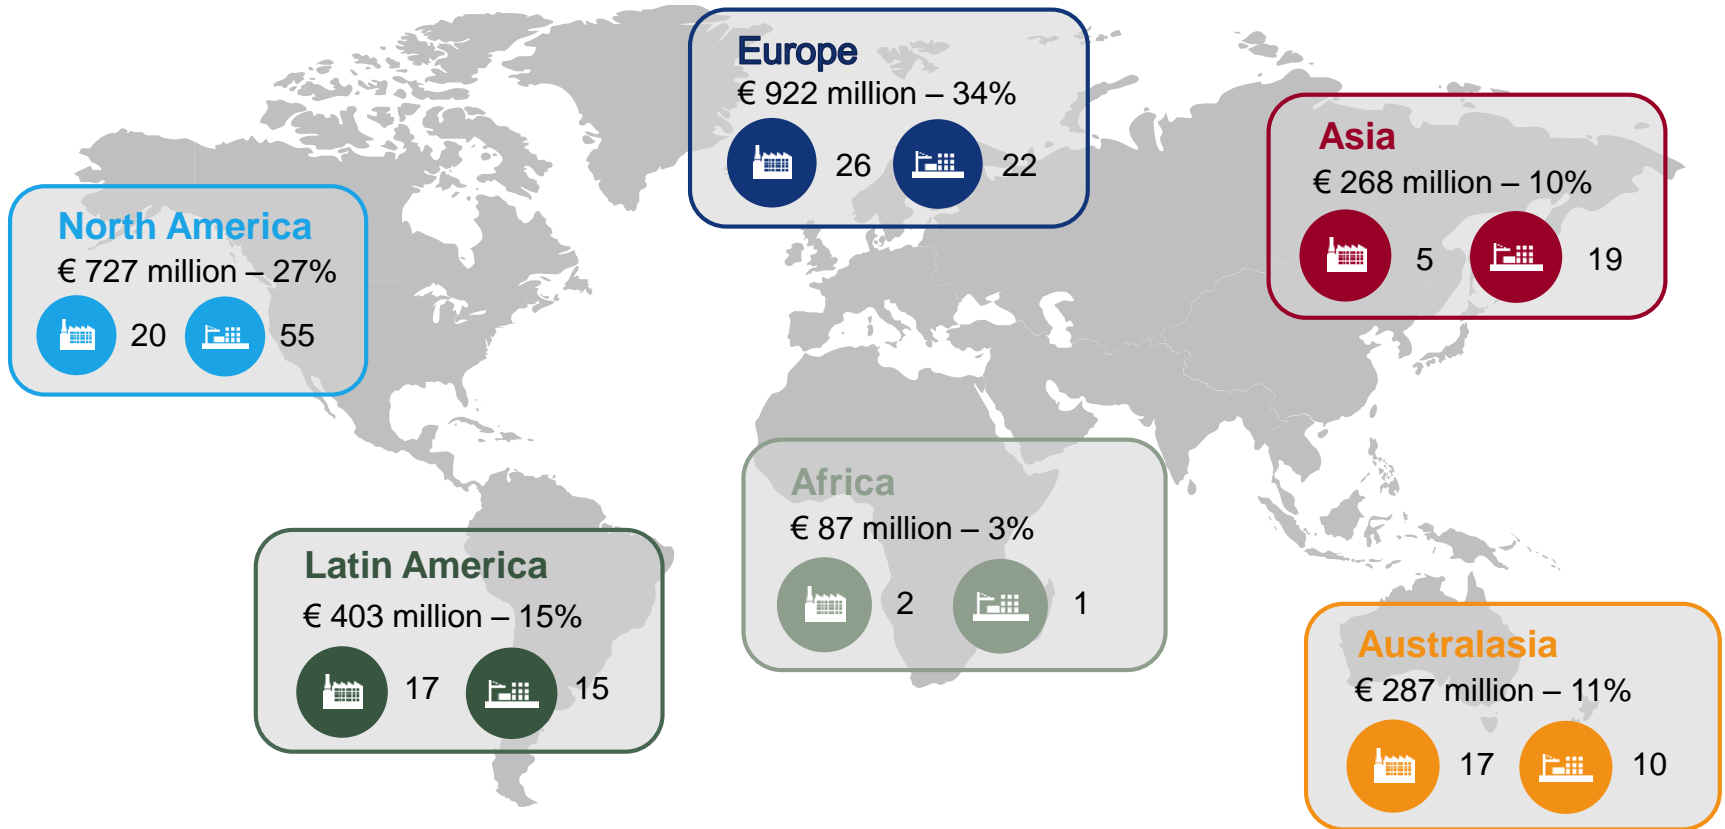

With a talented workforce cooperating with customers and end-users

Our **16,200 employees** across the globe provide tailored solutions that deliver on our customers' and end-users' needs.

Operating globally to serve our customers locally

80 + Manufacturing sites

120 + Distribution Centers

1400 + Injection Machines

600 + Extruders

To ensure that our partners

**Distribution
companies**

Contractors

Plumbers

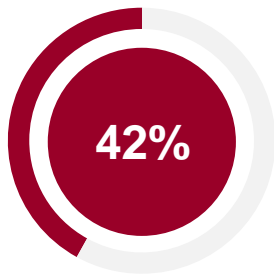

**Industrial
customers**

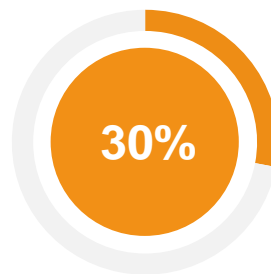

Overachieve in demanding market segments

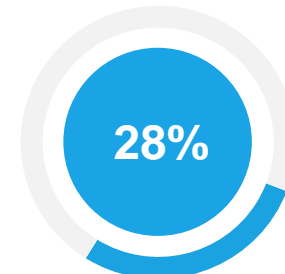

Building

Infrastructure

Industry

A portfolio of building solutions offering high performance and durability

Building

Plumbers, contractors and installers rely on Aliaxis' sanitary and rainwater products and systems, residential and commercial drainage, and other building solutions

Residential and commercial drainage

Rainwater management

Electrical ducts and conduits

Sanitary solutions

Providing solutions for our customers' challenges

Building

Reliable rainwater solutions

- ➔ **The challenge:** The Boston Logan Airport needed a reliable rainwater drainage and treatment system
- ➔ **The solution:** Canplas partnered with a sewerage contractor to offer an integrated solution to the airport's need, allowing for efficient rainwater treatment and separation of fats, oils and grease from its wastewater

Boston Logan Airport, USA

Providing solutions for our customers' challenges

Building

Effective roof drainage solutions

- ➔ **The challenge:** Need for a reliable and effective roof drainage system for a new to be built, large warehouse, capable of managing intense rainfall
- ➔ **The solution:** Partnering with the construction company, Akatherm engineered a safe roof drainage solution with the right balance of product ingenuity. On top, Akatherm offered total project support, including design, training and installation support

Logistics Center Car Manufacturer, Germany

Technical expertise and innovation for utilities and public works

Infrastructure

Aliaxis offers industries and communities a broad range of solutions for water and gas distribution, sewerage, stormwater management and irrigation

Water distribution

Gas distribution

Stormwater management

Sewerage systems

To bring much needed infrastructure

Infrastructure

Pipe design and installation for expansion of the Panama canal

The challenge: Be a trustworthy and technically capable partner for the construction companies in charge of the expansion of the Panama canal, in order to allow the passage of larger ships

The solution: Durman proved its added value providing advice and assistance on the design and installation, and ensured timely supply of a large number of electrical pipe systems

Panama Canal Expansion, Panama

To bring much needed infrastructure

Infrastructure

Irrigation solution to provide water to farmers' lands

The challenge: Support large infrastructure project to re-direct river water, thus providing alternative sources of irrigation water to farmers in the mid-Canterbury district in New Zealand

The solution: RX Plastics provided high-capacity piping solutions to transfer water from the Rakaia River to the farmlands in Barrhill

Barrhill Chertsey Irrigation, New Zealand

To bring much needed infrastructure

Infrastructure

Ensuring durability and reliability of gas piping systems

The challenge: Install a natural gas pipeline via Lake Thun to Interlaken (Switzerland), through water that is 200 meter deep and in a very challenging subsoil

The solution: Based on extensive technical advice, Frialen electrofusion couplings were chosen to ensure the durability and reliability of the gas piping system

Lake Thun gas connection, Switzerland

Adding value for our industrial partners

Industry

A wide range of industries count on Aliaxis' industrial piping portfolio tailored to their specific needs in fluid transportation

Industrial Piping Systems

Pressure systems

Pumps

Ceramics

To ensure that their business runs smoothly

Industry

Repair of water supply in Florida Keys with minimal disruption

- ➔ **The challenge:** Efficiently repair a drinking water supply line in a very salty and moist environment, and within a short period of time
- ➔ **The solution:** Straub repair couplings were chosen because their design allows a quick and easy installation on existing pipe, resulting in a minimal disruption of the water supply

Water supply, Florida, USA

To ensure that their business runs smoothly

Industry

Safe and reliable water disinfection in Italy

- ➔ **The challenge:** To develop a sea water generated sodium hypochlorite disinfection solution
- ➔ **The solution:** Design of the optimal set-up for the system, including a range of FIP valves, pipes and fittings. The system now proves to be a cost-effective, safe and reliable disinfection solution

Water disinfection, Italy
